

Group 3: Ann Arbor Hands-On Museum Report Out 2

Agnes Mar, Priya Shah, Olga Hamilton, Nathan Kushnir, Leo Leone

March 13th, 2026

Background and Problem Statement

- Nonprofit whose mission is to create moments of discovery that inspire curiosity for STEAM.

The Ann Arbor Hands-On Museum would like to **track year over year attendance with more segmentation, and insights into what donors to target** in order to make strategic decisions that bolster their participation.

Deliverable Overview

Attendance Dashboard

- Add YoY comparison of 52 weeks attendance
- Recreating program types chart
- Creating a graph of projected signups vs actual attendees

Membership Dashboard

- Add membership demographic trends using Census data
- Add types of people attending various programs
- Highlight year-over-year engagement trends with museum sign ups in museum vs. online

Donor Insight Dashboard

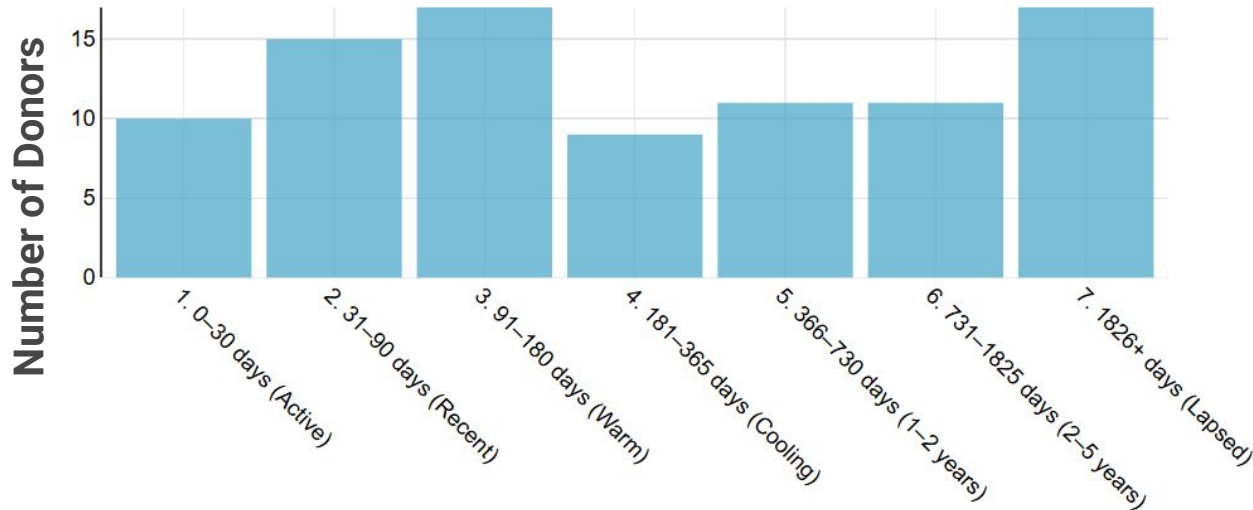

- Analyze donor behavior to understand giving patterns, retention, and engagement drivers
- Provide insights that improve engagement strategies and support long-term fundraising growth

Key Insight:

All dashboards empower staff with clear, data-driven information to guide smarter decisions and strengthen AAHOM's programs, operations, and donor engagement.

Visualization #1: Donor Recency

Days Since Last Donation – Top 100 Most Reliable Donors

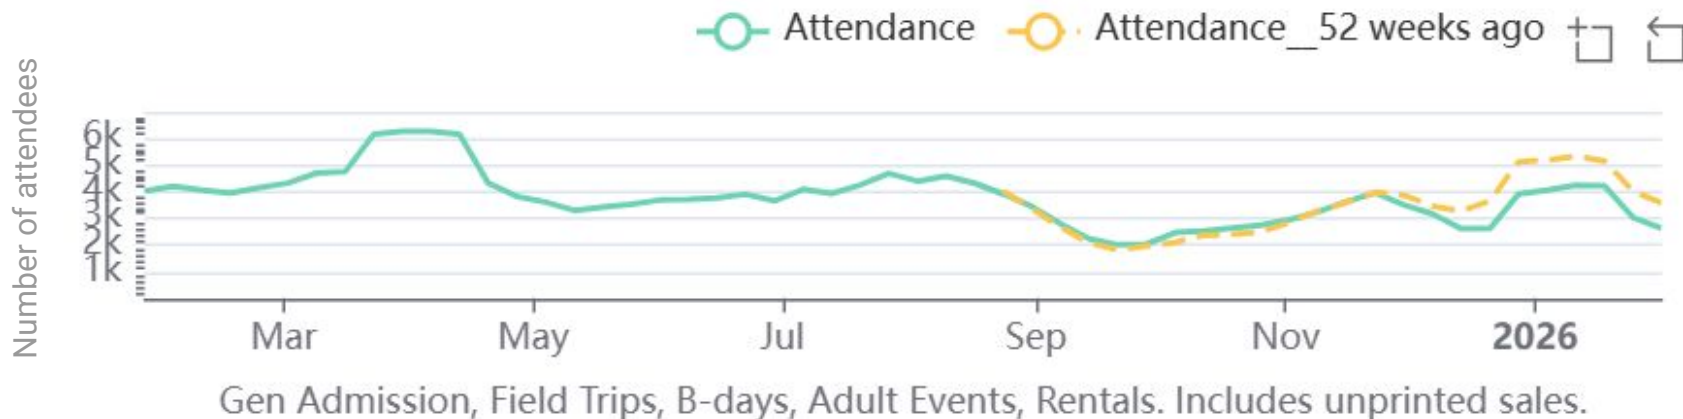

Donor Recency Summary

Most donors are active or recently engaged, with the largest groups giving within the last 90 days. About a dozen donors fall into the 91–365 day range, representing the best opportunity for targeted outreach before they lapse.

Overall, the data shows a strong active base, a clear at-risk middle group, and a long-term lapse segment that may benefit from reactivation efforts.

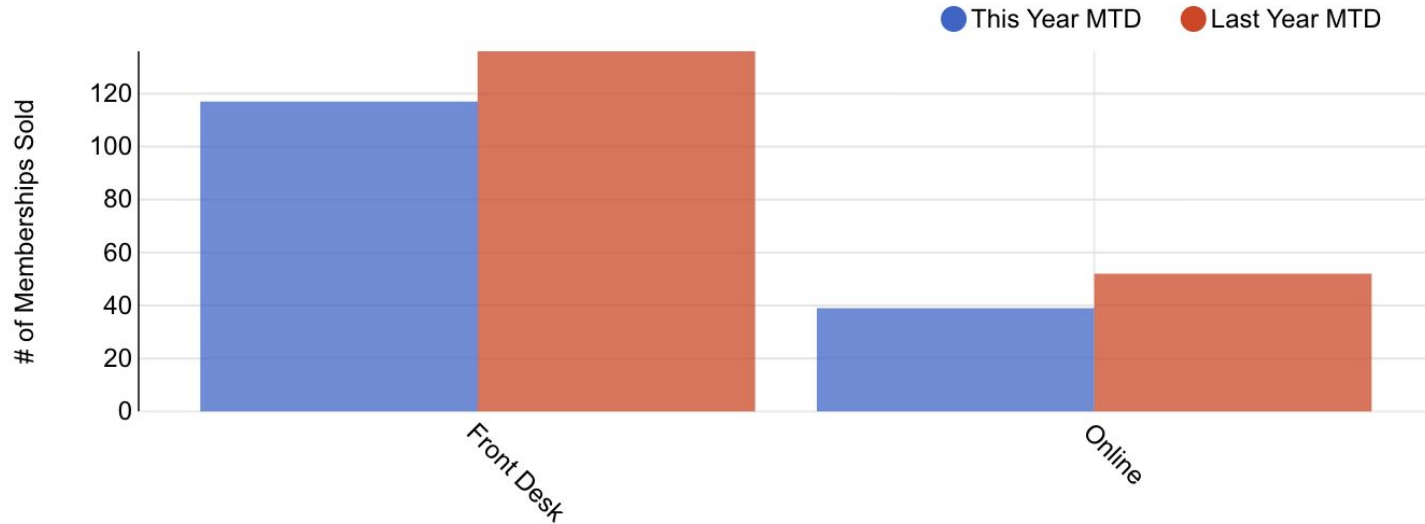

Visualization #2: YoY Attendance Comparison (4 week rolling)

4 Week Rolling YOY Attendance Comparison

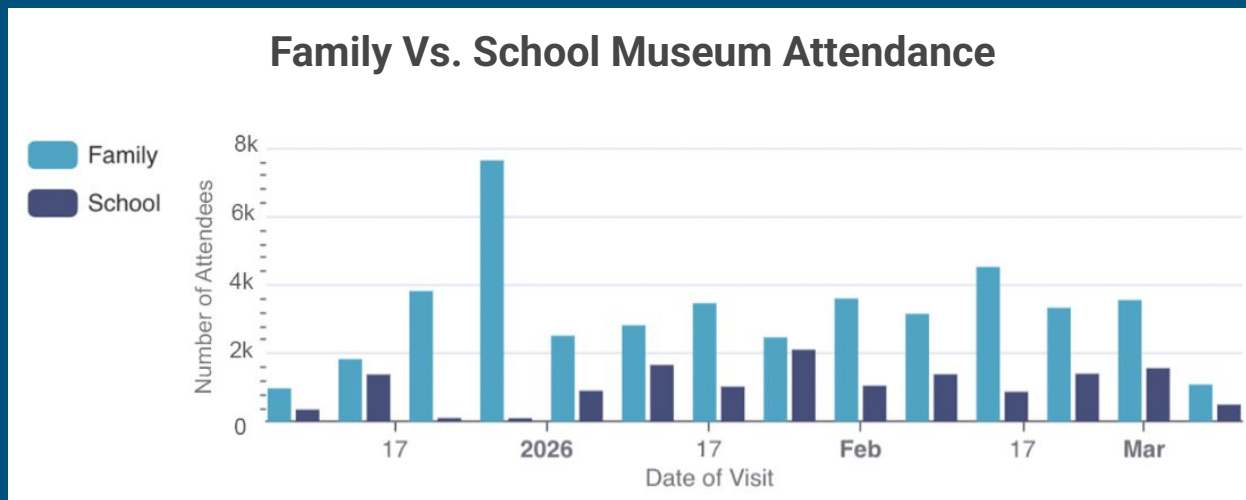

Visualization #2: Memberships Month to Date

Month to Date Memberships YOY Comparison

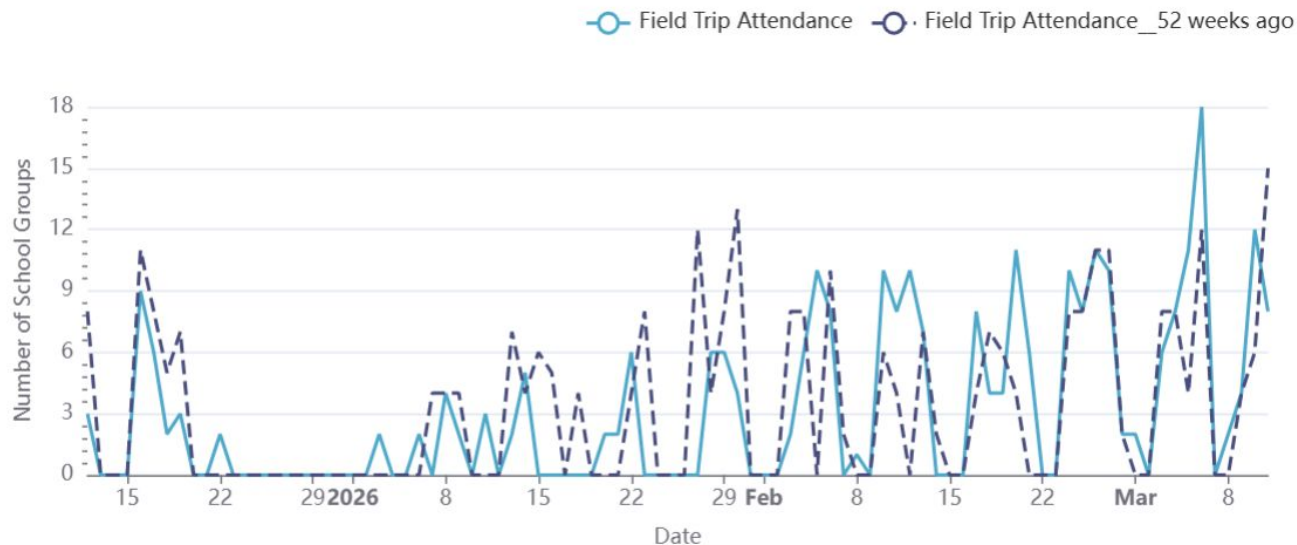

Visualization #3: Family vs School Attendance

- Family events include birthday parties, rentals, camps, etc. School events are field trips, outreach, etc.
- Grouped family vs school events for the client to better see what types of events are performing better when (more holistic experience)
- Transformed into a bar chart for easy viewability

Visualization #4: Family Vs School Attendance

Field Trip Attendance Vs. 52 Weeks Ago

Field Trip Attendance

This chart compares current field trip attendance to the same period last year (52 weeks ago) to identify seasonal trends and growth, showing a volatile but generally upward trajectory in school group visits as we move into March 2026.

Key Dates

March 20th, 2026

Have membership and attendance dashboard drafts complete

March 27th, 2026

Complete donor dashboard

April 10th, 2026

Have all dashboards completed with client's feedback

By April 17th, 2026

Train staff on new dashboard usage and deliver data refresh procedures on long term use

Gantt Chart

TASK TITLE	Notes	TASK OWNER	START DATE	DUE DATE	DURATION (Days)	PCT OF TASK COMPLETE
Attendance Dashboard						
YoY Comparison (4 week rolling) for general admission		Leo, Priya	1/19/26	2/6/26	17	80%
YoY Comparison (52 week) for birthday parties and rentals		Nathan	2/9/26	3/13/26	32	40%
Recreating and improving Chart with all program types that the museum offers and attendance for each program	Split between family and school events (fireside event vs field trip)chart for field trip vs chart for birthday parties, aggregate for everything	Everyone	3/9/26	3/20/26	11	40%
Projections (signups) vs. Actual Attendees for events (i.e field trip, bday party)	Will have this information. for field trips typically wont have that-would be hard to know what happened. any education program this is the case. group booking complicates	Priya	3/2/26	3/22/26	20	0%
Training staff on our dashboard creation/how to use it in the future		Everyone	4/6/26	4/17/26	11	0%

Challenges

- **Navigating analysis across multiple platforms**
 - Difficult to maintain consistency, keep analysis standard and organized
 - **Solution:** Use Gantt chart as a centralized tracker to organize tasks, monitor progress and ensure alignment on timelines / responsibilities
- **Learning new software**
 - Versai and Superset
 - **Solution:** Reading documentation, asking questions to our client during meetings, watching tutorial videos, Superset AI

Thank you!
